GEORGIY KVATSBAYA

Senior Analytics Engineer | Senior BI Engineer

Tbilisi, Georgia | kvatsbayageorgiy@gmail.com | linkedin.com/in/georgiy-kvatsbaya-ba0645230 | Open to remote / relocation

PROFILE

BI / Analytics Engineer with 7+ years of experience building financial analytics, data models, reporting platforms, and executive dashboards across fintech, banking, real estate, and technology. Strong in Snowflake, dbt Cloud, SQL, Tableau, and Python, with hands-on ownership of finance reconciliation, Capital Markets reporting, ELT design, BI platform administration, and stakeholder-facing analytics.

CORE SKILLS

Analytics Engineering: Snowflake, dbt Cloud, SQL, dimensional modeling, data marts, ELT/ETL, data quality, Monte Carlo
BI & Reporting: Tableau, Streamlit in Snowflake, financial reporting, executive dashboards, Tableau Server, REST/Webhook APIs
Engineering & Tools: Python, Apache Airflow, Apache NiFi, BigQuery, MySQL, ClickHouse, Greenplum, Spark SQL, Databricks, GitHub, Jira, Wiki/Confluence, Claude

EXPERIENCE

Fundbox | Senior Business Intelligence Engineer

Feb 2024 - Present | Tbilisi, Georgia

- Build and own financial data models in Snowflake and dbt Cloud for Accounting and Capital Markets, translating business requirements into reliable reporting datasets.
- Designed a cash-flow reconciliation model and Streamlit dashboard inside Snowflake to surface mismatches and support finance reconciliation workflows.
- Developed external reporting for Capital Markets lenders; reworked existing processes for reliability and maintainability while supporting critical Tableau reporting.
- Partner with finance stakeholders and backend engineers on data issues; contribute to data-quality and AI-assisted analytics initiatives, including an LLM-based Slack assistant for the dbt data model.

SAMOLET Group | Senior Business Intelligence Developer

Sep 2023 - Aug 2024 | Tbilisi, Georgia

- Built C-level financial dashboards for P&L, cash flow, accounts receivable, and debt across business units; developed SQL data sources and optimized Tableau performance.
- Administered Tableau Server: upgrades, performance/load management, plugins/connectors, access coordination, licensing, and REST/Webhook API integrations.

Careerist | Data Engineer / BI Developer

Apr 2023 - Oct 2023 | Tbilisi, Georgia

- Joined to establish an ELT foundation for the analytics database; deployed Airflow and created a reusable pipeline-factory structure.
- Built ~30-40 MySQL-to-BigQuery ingestion pipelines and ~10-15 BigQuery mart pipelines, coordinating migration of analytics workloads with developers.

EPAM Systems | Software Engineer

May 2022 - Apr 2023 | Tbilisi, Georgia

- Maintained and optimized Tableau reporting, improving dashboard performance and supporting workflows built on Databricks, Python, and Tableau APIs.

UCHi.RU | Business Intelligence Analyst

Mar 2021 - Sep 2022 | Tbilisi, Georgia

- Cleaned DWH model dependencies that caused inefficient Airflow DAG execution; built Tableau reporting and automated refreshes based on DWH readiness via Tableau REST API.

Tinkoff | Business Intelligence Analyst

Oct 2019 - Mar 2021

- Built BI reporting for ATM and Payments teams; optimized Greenplum SQL and automated recurring Excel reporting with Python across Greenplum, Spark SQL, ClickHouse, and Tableau.
